Sonic and LG Electronics Provide Instant Access to Hollywood Hits Roxio CinemaNow Now Live on LG Network Blu-ray Disc Players

NEW YORK (June 5, 2009) — Consumers can now digitally stream movies from Sonic Solutions® (NASDAQ: SNIC) — including new releases from major Hollywood studios often on the day and date the DVD release is available — on Blu-ray Disc players from LG Electronics, the companies announced today.

Marking the introduction of Sonic's Roxio® CinemaNow® service on LG Network Blu-ray Disc Players and Home Theater Systems, Sonic Solutions President and CEO, David Habiger today presided over the NASDAQ Opening Bell. He was joined by Michael Ahn, President and CEO of LG Electronics North America, to celebrate the groundbreaking alliance between LG and Sonic.

"With its Network Blu-ray Disc Players, LG is showing the future of home entertainment — a future in which the consumer is in complete control of an extensive library of instantly available premium video content," said Habiger. "Sonic will continue to work with premier CE device manufacturers like LG to meet consumers' expectations for seamless access to high-quality video entertainment from any connected device."

Ahn said, "Our premium 2009 line of Blu-ray players with NetCast Entertainment Access is redefining the home entertainment experience and delivering solutions that match the new dynamic demands of consumers' digital lifestyles. Roxio CinemaNow plays an important role in helping fulfill our goal to offer consumers fast, convenient access to a varied and almost endless catalogue of video entertainment."

Previewed at the 2009 International CES®, the LG Network Blu-ray Disc Players (models BD370 and BD390) and LG Network Home Theater Systems (models LHB953 and LHB977) are the first to incorporate the Roxio CinemaNow Service. Available now, LG's BD370 and BD390 Network Blu-ray Disc Players offer consumers easy access to a vast array of movies and TV shows.

Equipped with WiFi capabilities and 1 gigabyte of memory, the BD390 is the first-ever Network Blu-ray player to offer an interactive Download-to-Own and Pay-Per-View option, allowing consumers to purchase Roxio CinemaNow content at the click of the remote. LG's Home Theater systems (LHB953 and LHB977) deliver "Full HD" 1080p video performance, upscaling from standard DVDs to 1080p, and a premium surround sound experience.

LG Electronics joins the rapidly expanding Roxio CinemaNow ecosystem of compatible devices providing consumers a more flexible digital entertainment experience through extended multi-device access and playback capabilities. Sonic's device ecosystem, powered by its new Roxio CinemaNow SDK (software development kit), is helping streamline the integration of turnkey premium entertainment delivery, management and sell-through

Sonic and LG Provide Instant Access to Hollywood Hits

Services in next-generation digital home devices including portable media players, Blu-ray Disc players, set-top boxes, mobile phones, Web-connected television sets and PCs equipped with Roxio Venue™ software.
