

LG's BD300 is a complete home entertainment solution that is Netflix® Instant Streaming Ready. This unique feature allows consumers to instantly stream content such as movies and network television programming from the extensive Netflix® library of titles (more than 10,000 titles) directly to the BD300 for playback. Unlike any other Blu-ray player currently on the market, the BD300 will allow consumers to utilize an on screen menu, select their preferred title, and view any Netflix® content almost instantaneously. This provides consumers with an easy alternative if no DVD or Blu-ray disc is available.

The BD300 as offers standard features such as quick-load/boot times – among the fastest in the industry, BD Live for interactive content applications, Dolby® True HD® and HDMI connectivity.

- **Netflix® Watch Instantly™ Service** – An on screen menu allows consumers to select content from the Netflix® library to download directly to the BD300 and view also instantly.
- **BD Live** – The BD300 supports BD Live for interactive content applications.
- **Dolby® True HD®** – The BD300 supports Dolby® True HD®
